APPLICATION ENHANCEMENTS & IMPROVEMENTS

Grading Reports Indicate “Dropped” Students

The **Grades Not Entered** and **Grade Verification** reports now indicate students that dropped the course using the Drop/Restore feature. This will help administrators and teachers check for students who dropped the course during the term to see if they do/don’t have a grade submitted.

Grading System > Reports – Grading > Grades Not Entered report (aka Incomplete Grading)

Display Students = Yes

- Student will be listed with (Dropped) indicator next to the name.
- A column has been added with total number of Dropped student with no grades.

APPLICATION UPDATES/CHANGES

Student Name Suffix

The MA DESE now requires a student name suffix (ie. Jr, Sr, III) to be recorded separately from the Last Name field to match changes made in Student SASID Registry.

iPass sites should use the Suffix field on the Student Profile screen to record the suffix to match the MA DESE student registry. At this time the DESE is not collecting the Suffix in the SIMS report.

SIF Transmission – Stripping Suffix Out of Last Name Field

For iPass sites that want the student’s suffix to be included on Transcripts and Report Cards or to be included in the Last Name field for 3rd party application matching, the suffix will need to remain in the Last Name field as well. To keep this from causing validation errors for SIMS SIF Transmission, the program will now “strip out” any suffix value found in the Last Name field before sending the StudentPersonal object.

Values to be stripped out are identified in System Configuration > Parameter Maintenance > Application = TEAM, Parameter = Demographics. These match the drop down selection option on the DESE Status SASID Registry. Parameter values are not case sensitive.

SYSTEM PARAMETERS	
Application: TEAM	Parameter Group Name: Demographics
Parameter Name	Parameter Value
Valid Name Suffixes	I,JR,SR,II,III,IV,V,VI

DOE ID Manager > Export for SASIDs

The Export for SASIDs file now includes the Suffix field to match the MA DESE Student SASID Registry. The Export now includes the file header required for upload to the DESE.

When you run the Export, students with no SASID number will be included in the export file with the following data fields:

“LASID”, “First Name”, “Middle Name”, “Last Name”, “Suffix”, “Date of Birth”, “City of Birth”, “Gender”, “Town of Residence”

The following file header will be added to the export file:

```
DOEHEADER,DISTRICT=00880000
DOEHEADER,ELEMENTS=DOE001,DOE003,DOE004,DOE005,DOE999,DOE006,DOE008,DOE009,DOE0014
DOEHEADER,DATEFORMAT=D10
DOEHEADER,GENDERFORMAT,M=Male,F=Female,N=Nonbinary
```

DOE ID Manager > SASID Import

The SASID Import now includes the Suffix field to match the file format coming back from MA DESE. During the SASID Import process, any student with a suffix will populate the Suffix field in iPass.

The file coming back from the MA DESE includes the following fields:

LASID, First Name, Middle Name, Last Name, Suffix, Date of Birth (MM/DD/YYYY), City of Birth, Gender, Town of Residence, SASID
