

## Welcome to Wednesday's Wisdom – A weekly dose of support! August 12, 2015

### Announcements

**TODAY – Monthly User's Group WebEx Meeting – August 12 at 1:00pm – Topic: End of Year Procedures & Preparing for the New School Year.** We will discuss the End of Year Procedures and take a look at what you need to do to get ready to start your new school year at today's iPASS User's Group WebEx meeting. [Click here for User's Group WebEx details](#)

**Job Well Done!** – We would like to acknowledge all of the staff responsible for state reporting in your district. We witnessed firsthand the effort and time they dedicate to getting accurate data to the DESE for end of year reporting. It is a stressful time of year to meet all of the deadlines. We want to thank all of you for your patience in working with our Support Team as we helped you with your errors and with SIF transmission.

We are working with our development team to get you more tools to view events easier as they are triggered and to be able to push your data to the state so that the data does not need to be manipulated to trigger each event when fixing errors

### Harris School Solutions – Product Spotlight

eTritition is the first web-based school nutrition product in the market that allows districts to meet the challenges faced in a K-12 school nutrition program.

Developed by school nutritionists, eTritition incorporates 40+ years of K-12 user experience into a fully integrated web-based nutrition solution. Focused on ease of use and customization, real-time information is available online at any time, from any computer. Districts can choose from a variety of modules to tailor the system for efficient workflows, flexibility, and the ability to meet major reporting requirements. Authorized staff have the ability to input, retrieve, share, and analyze student, financial, and nutritional data for current or prior school years, as well as manage Free and Reduced Meal applications.

Utilize your district's pre-existing technology infrastructure and platform to avoid costly equipment purchases and capitalize on the benefits of a web-based .NET application. Offered in SaaS and Self-Hosted options, eTritition is browser agnostic and features:

- Centralized SQL Server Database
- Point of Sale
- Reporting
- Menu planning
- USDA-approved for nutrient analyses required in the school meal programs
- Production and inventory
- Financial accounting
- Free and reduced application processing through EZMealApp.com
- Online payments through EZSchoolPay.com

#### Key Benefits:

- Faster, more efficient serving lines
- Continuous access with "Safety Net" serving if the network fails or disconnects

- Browser-based access so students receive service at any cafeteria in your system
- Updates are made in just one place – allowing cafeteria computers to be configured very simply
- Sensitive data is encrypted and not available to unauthorized users
- Modular approach covers your district's unique needs
