IP-3262	Transcript and Quad Transcript > Dropped courses are no longer printing on transcripts.	1576127, 1576321

**NOTES:**

**Bio Verification Report for “Include Incoming Only” Students:**

Prior to running the report the next school year must be set up:

- Setup new Calendar Year (Administration > District Resources > Calendar Years)
- Set up School Calendar Start/End Dates for the new School Year for each school (Attendance > Maintenance – Attendance > Calendar Maintenance)
- Set up Academic Year Settings for the new School Year. *Note: the Term Start/End Dates can be filled in and corrected at a later time if not known at the initial time of set up* (Scheduling System > Maintenance – Scheduling > Academic Year Settings)

All students must have Next Year School assigned for the new School Year (Biographical System > Mass Update Students > Set Year for Next Year’s School & Next Year’s School)

Go to Biographical System > Reports – Biographical > Bio Verification Report

- Set Academic Year = NEXT School Year
- Grade Level = If selected, this is the student’s CURRENT Year Grade Level
- Include Incoming Only = Yes (default is No)

For more information on how to run the Bio Verification Report please go to iPass Help > Biographical > FAQ > [What are recommended parameters to select when running the Bio Verification Report?](#)

**To hide the iPass 2 Go link:**

Go to System Configuration > Parameter Maintenance

- Select Application = TEAM
- Select Parameter Group = System

Look for the Parameter Name of “Hide iPass2Go Link”, set the Parameter Value = Yes, and Submit.

If the Parameter Name is not listed you will need to add it. Scroll to the bottom and use the first empty field.

- Add Parameter Name = Hide iPass2Go Link (*exactly as written*)
- Add Parameter Value = Yes
- Submit

Upon Submit, the new parameter will be added in alphabetical order. When the parameter is set to Yes the link will no longer display on the iPass Login screen.

### **iHealth Drop Down Lists:**

Medications, Illnesses, and Allergies codes set to Display Order = 999 will display in alphabetical order by Description. Setting all the codes to Display Order = 999 will allow sites to choose to set frequently used codes to Display Order 1, 2, 3, 4, etc, to have them display at the top of the list before the others.

NOTE: A script needs to be run on the iPass site to set all the codes to Display Order values = 999. Since individual iPass sites may have set up codes with specific Display Order values the script will not be run automatically on all sites. Support will be contacting iHealth sites to find out if the script should be run on their site. Users who would like to request the script be run should submit an eSupport ticket requesting the iHealth Display Order Script be run on their site.
