How can I give ALL Teachers/Staff access to view future Teacher/Student Schedules?

The Administration > District Resources > District Configuration setting for "Show Which Schedules" can be set to "All" to show future Teacher/Student Schedules to ALL TEACHERS.

The iParent and iStudent Configuration setting of Show Schedule Information set to "Current & Prior" will HIDE future schedules from the students and parents. This setting "trumps" the District Configuration setting. *Click here for more information.*

You use District Configuration Setting "Show Which Schedules" set to "Current and Prior" to <u>HIDE</u> Future Teacher/Student Schedules from teachers. If you want to do this, then you would need to use Assign Teacher Access to give Administrators/Counselors/Teachers access to see Future Teacher/Student Schedules.
